```

Test Document
=============

This is a test document for any2pdf.

Features:
- Multiple format support
- OCR capabilities
- AI chat integration
- GPT-5 reasoning control

Perfect for converting documents to searchable PDFs!

<!DOCTYPE html>
<html>
<head>
    <title>any2pdf Test Page</title>
</head>
<body>
    <h1>any2pdf - Universal Document Converter</h1>
    <h2>Features</h2>
    <ul>
        <li>Convert Office documents (PPTX, DOCX, XLSX)</li>
        <li>Convert images (JPG, PNG, GIF, SVG)</li>
        <li>Convert text files (TXT, MD, JSON, CSV)</li>
        <li>AI Chat with GPT-5 & Gemini 2.5</li>
        <li>Reasoning effort control</li>
    </ul>
    <h2>Performance</h2>
    <p>Multi-threading support for 50-70% faster conversion!</p>
</body>
</html>
```

Project Documentation

Overview
This is a sample markdown file for testing any2pdf.

Features
- **Format Support**: Office, Images, Text, PDF
- **AI Chat**: OpenAI GPT-5 & Google Gemini
- **Performance**: Multi-threading, Smart caching

Usage
```bash
python document_to_pdf.py ./docs --merge
```

Benefits
? Fast conversion
? AI-powered chat
? Multiple formats

```
